PROFESSIONAL SUMMARY

I am a dedicated React developer with 1.9 years of experience, who constantly strives to improve my skills and consistently strive to deliver top-quality products that meet the highest professional standards. From developing complex functionality to designing intuitive user interfaces, my focus is always on delivering high-quality products. And with a keen eye for detail and a commitment to thorough code testing, I ensure that every project I work on is seamless and error-free. I am confident that I can make a valuable contribution to your team, and I would be honored to join your organization. Let's work together to build something truly remarkable.

JOB EXPERIENCE

Frontend Developer

SETTERS   Nov 2021 - Jan 2023

- As part of developing React applications, I extensively utilized Redux to manage the application's state and used TypeScript to define data types and prevent potential errors.
- Developed intuitive and user-centric features including search, navigation, filtering, shopping cart, pagination, sliders, modals, tabs to optimize product quality and enhance UX.
- Managed project timelines and priorities, communicated regularly with stakeholders, and contributed to the overall success of the team.
- Conducted manual and automated testing using Jest to ensure high-quality code and minimize bugs.
- Close collaboration with the designer and product manager to improve UI and increase conversion rate.
- Worked in industries such as health, design, beauty, education, and e-commerce, which allowed me to develop skills in adaptation and flexibility when working with different business models.
- Participated in daily team calls and provided detailed progress reports to ensure effective communication.

Achivements:

- As part of an e-commerce project, I developed an advanced search and optimized shopping cart with a pleasant UI, which helped increase user conversion by 10%.
- Improved performance of the company's main app by implementing caching and code splitting by 15%.
- Developed a calorie counting system for the health project that enables users to create personalized meal plans based on their goals and physical activity level.

Web Developer

FREELANCE   Jun 2021 - Nov 2021

- Complete creation of UX/UI for presenting the concept of a future application to the client.
- Using ready-made Bootstrap components to maximize development speed.
- Using the Formik library to create reliable forms.
- Using Babel to optimize the work of the project in older browsers.
- Searching and correction of possible bugs using manual testing before giving the project to the client.
- Using Webpack to bundle modules and Gulp to optimize tasks, mainly for SCSS and Browsersync.
- Adapted apps for all types of devices to reach the maximum audience coverage.
- Setting up of receiving user data from the site using Node.

Achivements:

- Transitioning offline stores to online, resulting in a 3x increase in profits and reach.
- Redesigned the client's website, which increased the number of requests from 10 to 30-35 per day.
- Increase in conversion rate by 10% due to automatic opening of forms after a certain amount of time.

EDUCATION

Taras Shevchenko National University of Luhansk • Faculty of Economics and Business   2016-2019

- Marketing Management

SKILLS

- React/Redux
- JavaScript/ TypeScript
- HTML/SCSS
- Git/GitHub
- Axios
- Jest
- Webpack
- Babel
- Node.JS/Express
- MongoDB

LANGUAGES

- English   B2
- Polish   B1
- Ukrainian   Native
- Russian   Native

COURSES

Udemy
WEB Developing
HTML • CSS • Gulp • Webpack

Udemy
JavaScript + React/Redux
JS • REACT • REDUX • Git

Udemy
Practical TypeScript
TypeScript

freeCodeCamp
MERN Stack
Node.JS • express • MongoDB
